BIG TEX TRAILERS SELECTS, IMPLEMENTS BESTTRANSPORT TMS SOLUTION

Project moves from launch to full implementation in under 30 days

August 25, 2015 – Columbus, OH – [BestTransport](#), a leading provider of cloud-based Transportation Management (TMS) solutions, today announced its latest customer implementation, Big Tex Trailers headquartered in Mt. Pleasant, TX. Big Tex Trailers is one of the country's leading manufacturers of heavy duty trailers and one of the fastest growing companies in its market.

BestTransport's TMS cloud-based software was chosen from an undisclosed set of TMS vendors. Functionality, flexibility, competitive pricing, and speed of implementation were all key selection criteria. Facing an aggressive timetable, BestTransport was able to fully implement the software, train Big Tex personnel, and enable transactions to take place in less than 30 days.

"We are very pleased with BestTransport's software and team," said Jim Tunnell, Big Tex Trailers CIO. "They worked with us as a team every step of the way to make the implementation as smooth as possible while their software is delivering to expectations. It was a great project."

"Implementation of BestTransport has allowed us to decrease our load acceptance time from over 48 hours a year ago to under 4 hours currently on most loads while taking advantage of the most cost effective transportation partner with available capacity in each lane. With multiple shipping locations, we have centralized the process to have visibility and accountability in both service and pricing".

"Our carrier partners are able to book dock time for each location, once a load is accepted, which provides a vast improvement in time management of the shipping process. We are quite pleased with the results from the TMS." explained Garland Hutson, Big Tex Transportation Manager.

Remarked BestTransport's CEO, Mike Dolan, "Big Tex Trailers has grown tremendously and has plans for continued aggressive growth. They have been very thoughtful about

ensuring they have the systems in place to support that growth. I'm pleased our TMS software is a key component to helping Big Tex achieve its goals."

About Big Tex Trailers

Since 1982, Big Tex Trailers has been synonymous with heavy duty, high-quality trailers. Over the last five years, Big Tex has embarked on a mission that has truly revolutionized the trailer industry. In 2009 during the midst of the "Great Recession," Big Tex forged a vision to build the absolute "Best Trailers" at the "Best Price" and to be the absolute "Best Partner." Big Tex Trailers has continued to grow with the marketplace, currently expanding faster than any company in the industry. More information can be found at www.bigtextrailers.com

About BestTransport

BestTransport is a leading provider of cloud-based Transportation Management Solutions (TMS) which enable manufacturers, distributors, suppliers and freight and parcel carriers to efficiently plan, execute and manage all aspects of their shipping transport operations. BestTransport's TMS can reduce a company's overall transportation spend, enable tighter cost management and expense avoidance, provides enhanced shipment visibility, benchmarking and facilitates collaboration between shippers and carriers.

BestTransport's customers move more than a billion dollars of freight to and from thousands of domestic and international locations using our TMS software as their backbone for shipping their goods to customers. More information is available at www.besttransport.com.
